

I had a clinical practice in Aalborg. I was grouped with Danish students, and an instructor acted as a consultant that organized the clinical practice entire period. I have experienced in delivering physical therapy treatments for patients in in-patient ward, advising therapeutic exercise for post-surgical patients with ACL injury, sharing ideas with nurse-aid students and occupational therapy students. Additionally, I also joined the class regarding pelvic exercise and I have presented physical therapy profession in Thailand to Danish lecturers and students in the class “Study for all”.
